**Table of Contents of November E-News: October-November, 2022**

- **Key Activities of Division of Professional Practice**
  - **Monthly meetings**
  - **President's presentation at the International Association of Psychosomatic Medicine**
  - **Book launch: Joe Kalisa (Div 17 Executive Member)**
  - **Early Career Marathon**
  - **Congress/Conference Activity**
  - **Monthly E-News and Webinars**
- **Items / resources of interest**
  - **Items from APA, PBS, ABC, etc. – Including:** Are we in an anxiety crisis?; Social determinants of health & wellbeing; WHO: physical inactivity is expensive
- **Snapshot of Events over the past month**
- **The World in the time of COVID**

**Appendix: Previous items/resources of interest (Nov/Dec, 2021 onwards to July/August, 2022)**

**Division 17 Activities/News of Division of Professional Practice (October-November, 2022):**

**Monthly Division Executive Meetings:** The Executive team are meeting monthly by zoom under the leadership of Susan McDaniel to discuss current activities, future goals and directions and to establish a sense of collegiality amongst the team. **This has been a great success** with most of our expanded membership attending each month (USA: Susan McDaniel, James Bray, Diana Prescott, Nancy Ruddy, Christine Jehu; Australia: Tim Carey, Robyn Vines, Judith Gullifer; Rwanda: Joseph Kalisa. **A Key Focus** in all activities is the role psychology can play in integrated mental and general health care and the systems change needed to integrate our discipline and profession more effectively into health care services. New members of the team are welcome, particularly early career psychologists.

**Our President: Susan McDaniel presents at the International Congress of Psychosomatic Medicine:**

**“Real-Life Implementation of the Biopsychosocial Approach: A Personal Evolution with Families, Genes, Complexity, and Teams.”**

(October, 2022: Rochester, New York)

**Susan McDaniel PhD** described the common scientific roots of biopsychosocial and family systems approaches, and the power of relationships in promoting healing. Drawing on the rich biopsychosocial systems history at the University of Rochester, she described some of the work that has evolved as a result of integrating these two paradigms. Interacting with George Engel MD and Lyman Wynne MD PhD, they began with a focus on the family and its influence on health that led to the development of Family-oriented Primary Care (2005) and Medical Family Therapy (1997, 2014). These approaches require close collaboration between interprofessional colleagues who together implement an integrated biopsychosocial approach. This collaboration started in primary care and spread to specialty healthcare settings, such as genetics (2006). Parallel to the focus on optimizing family functioning as part of healthcare, integrated care draws on professional collaboration and the science of effective teamwork (publication: 2018) to strengthen interprofessional functioning. The work has led to closer study of doctor-patient communication (publications: 2005, 2007, 2008, 2013, 2021), and the development of a **Physician Communication Coaching Program**. This Program is dedicated to ongoing attention to communication as one of the fundamental tools of comprehensive biopsychosocial care (publications: 2020, 2022). Susan discussed the education and training of psychologists and physicians that allows for comprehensive biopsychosocial care (pubs: 2018, 2021), and conclude with a recognition of the growth of the many different creative approaches to the real-life implementation of a biopsychosocial approach around the world (publication: 2022).

**Book just launched by Div. 17 Executive Member: Joseph Kalisa: “Land of a thousand stories: Rwandan Narrative Therapy and Community Work”**

See: [https://www.amazon.com.au/dp/B0BHVLDFSM/ref=monarch\\_sidesheet](https://www.amazon.com.au/dp/B0BHVLDFSM/ref=monarch_sidesheet)

**Congratulations Joe!!**

**From Joseph Kalisa's message to readers:**

“This unique and powerful book shares stories of original work by Rwandan narrative practitioners as they search for local ways of responding to profound social sufferings and mental health struggles.

From the early work of the counsellors of Ibuka (the national genocide survivors association) to current decolonising and culturally congruent forms of practice, these stories from the land of a thousand hills will move, challenge and inspire. From Beata Mukarusanga's preface: *‘This book conveys a journey that started with the Ibuka workers in response to the profound trauma of the genocide against the Tutsi, a trauma that continues to affect our lives individually and collectively in so many ways. It is a journey that moves also through territories and landscapes of resilience, new hopes, new ways of living. It’s a journey through both the painful past and the preferred story of Rwandans.’* .... *‘Throughout Rwandan history, our people have always searched for local ways to comfort and alleviate pain and sorrow. This is true in the cities and also in rural areas... In this book you will read of the contemporary search to find local solutions and create culturally resonant ways of working, in the quest for decolonising practices that inspire a search for cultural healing in all communities.’*”

**Early Career Marathon:** Our **President-Elect, Professor Tim Carey** participated as one of the panel in this marathon event, which evaluates multiple presentations from early career psychologists around the world. This is now an annual event and Division 17 has been represented since the inaugural 24-hour event in 2021.

**International Congresses:** submissions are being prepared (for symposia and papers) to present at the following conferences/congresses (amongst others)

**2023: 18<sup>th</sup> European Congress of Psychology July 3-6:** Brighton, UK. Members of our Executive team will attend both the Congress and the IAAP Board meeting prior to the conference and will run a Division 17 Symposium on *“The Role of Psychology in Integrated Health Care: An International Perspective”* and **APA: Washington**

**2024: ICP:** Rio di Janeiro; **2026: ACAP,** Florence, 2026

Please be in touch if interested in contributing to our Division’s Congress input: email the Division 17 Congress Coordinator/Manager’:

Professor Judith Gullifer (Monash University, Australia: [judith.gullifer@monash.edu](mailto:judith.gullifer@monash.edu)) with lecture, symposia and/or poster ideas.

**Monthly E-News - see:** <https://iaapsy.org/divisions/division17/> : This continues each month, including: Division activities, items of interest, ‘snapshots’ of current events and changing statistics in *“The World in the Time of COVID”*. **E-News Editor: Immediate-past President: Robyn Vines PhD**

**Division 17 Webinars:** (available on IAAP Website (introduced in previous E-News): see:

<https://iaapsy.org/members/webinars/> )

**29.3.22: ‘Integrated primary care and the science of teamwork’:** Professor Susan McDaniel: incoming Division 17 President (30.7.22) and Professor Eduardo Salas: *‘Integrated primary care and the science of teamwork’* on 29<sup>th</sup>/30<sup>th</sup> March, 2022.

**15.5.19: “The Critical Role of Psychology in an Integrated Primary Care Model”**

- <https://iaapsy.org/members/webinars/the-critical-role-of-psychology-in-an-integrated-primary-care-model-presented-by-iaap-division-17/>

**New Look Website:** Ongoing – our Executive team is working on this.

### **Advance notice/forthcoming events:**

- Congresses – as above

### **Items/resources of professional interest:**

**October-November, 2022: (with thanks to the APA, APS, PBS, ABC – and other sources):**

**For previous ‘items/resources of interest’ from Division 17 E-News, see Appendix below)**

**Are we in an anxiety crisis? (1.10.22):** <https://www.abc.net.au/radionational/programs/saturdayextra/are-we-in-an-anxiety-crisis-/101492086>

Anxiety levels ramped up during the pandemic around the world. In the US, over 40 million people show symptoms, leading to a recommendation that all US adults under 65 be screened for the mental health condition. Should the same be done in Australia? And what can we learn from the ancient Stoics about handling anxiety?

Duration: 17 minutes 7 seconds17m

**Social determinants of health and wellbeing:**

**Slouching towards Utopia:**

<https://www.abc.net.au/radionational/programs/saturdayextra/slouching-towards-utopia/101492544>

Economic historian and former Clinton adviser, Brad DeLong's new book "Slouching towards Utopia" explores the economic history of the period 1870-2010 which he calls the long 20th century. Previous generations would have thought such wealth to be a guarantee of utopia, but has it really turned out this way? Duration: 18 minutes 8 seconds18m

**Lifestyle Factors:**

**General Health and Wellbeing:**

**"Being physically inactive is expensive" (27.10.22)**

[WHO highlights high cost of physical inactivity in first-ever global report](https://www.who.int/news/item/19-10-2022-who-highlights-high-cost-of-physical-inactivity-in-first-ever-global-report)

<https://www.who.int/news/item/19-10-2022-who-highlights-high-cost-of-physical-inactivity-in-first-ever-global-report>

World Health Organization: [worldhealthupdates@campaign.who.int](mailto:worldhealthupdates@campaign.who.int)

**"Health in Australia today —what will increase our chance of a healthy life?"**

**ABC Interview (1.11.22) :** <https://www.abc.net.au/radionational/programs/healthreport/1730-magdas-big-health-check/>

Magda Szubanski talks about her own reaction to the extent of chronic illness in Australia and why it's not just a fact of life

The ABC series '*Magda's Big National Health Check*': see: <https://iview.abc.net.au/show/magda-s-big-national-health-check/>

**Substance Use Disorders:**

- **The shocking rise in alcohol-induced deaths (1.11.22):** The latest statistics on causes of deaths in Australia. For some of the alcohol-related conditions the levels were the highest in about ten years. This is avoidable and, in fact, advocates for greater alcohol control measures have been warning for years. Guest: Caterina Giorgi CEO of FARE (Foundation for Alcohol Research and Education) See: <https://www.abc.net.au/radionational/programs/healthreport/rise-in-alcohol-induced-deaths/101591878>

- **'Delivering a message: alcohol causes breast cancer' (24.10.22):** Authored by BELINDA LUNNAY; SAMAN. 'Breast cancer is the *most common cancer affecting women in Australia and alcohol accounts for 10% of diagnoses. Alcohol is a Class-1 carcinogen. However, we live in an "alcogenic" society in Australia where alcohol is everywhere.*' 24 October 2022 Insight: *Medical Journal of Australia*: Issue 41, 24.10.22: <https://insightplus.mja.com.au/2022/41/delivering-a-message-al> Contact: [editorinsight@mja.com.au](mailto:editorinsight@mja.com.au)

- **Drug and Alcohol/Substance Use Disorder: Six Revelations From Matthew Perry's Diane Sawyer Interview**

The 'Friends' star talks about drug abuse, addiction and his book *'Friends, Lovers, and the Big Terrible Thing'*. He reveals how his *'Friends'* experience was shaped by it.

During the hour-long interview on ABC, Perry elaborated on his drug abuse, how he wants to settle down

### **Talking About Grief with Anderson Cooper: New Yorker Interview**

**"All There Is":** by [Amanda Petrusich](#)

*'After my husband died unexpectedly this summer, I found comfort in Cooper's podcast about death and loss'*

[https://www.newyorker.com/culture/the-new-yorker-interview/talking-about-grief-with-anderson-cooper?utm\\_source=nl&utm\\_brand=tny&utm\\_medium=email&utm\\_term=tny\\_daily\\_digest&bxid=5bd66f892ddf9c619438901f&cnid=21388342&hasha=089663d0748b74d8e78dccc03faa7cd2](https://www.newyorker.com/culture/the-new-yorker-interview/talking-about-grief-with-anderson-cooper?utm_source=nl&utm_brand=tny&utm_medium=email&utm_term=tny_daily_digest&bxid=5bd66f892ddf9c619438901f&cnid=21388342&hasha=089663d0748b74d8e78dccc03faa7cd2)

### **How To Stop Mass Shootings:**

<https://click.info.apa.org/?qs=5fee5af5ae2c3c437cf9ce3db23fe486105e81a4ce2e372d56e70e2c920fd3aa1da9f0be5e44a4f8dafd678bed99>

Americans have become accustomed to tragic headlines of mass shootings in schools, grocery stores, and other public places. APA's *Speaking of Psychology* podcast to talk about research on what drives most mass shooters, why thinking of workplaces, and elsewhere to make the next mass shooting less likely.

### **October-November, 2022: "Snapshot of Events":**

As with previous recent months, October has been a turbulent month full of world events including, amongst so many other things, the following:

- **Ukraine:** the ongoing war in Ukraine continues to wreak havoc both within Ukraine (massive water shortages and power outages due to targeted bombing by the Russian regime) and internationally (resumption of blockages on shipments of wheat out of Odessa, despite earlier agreements. Ethiopia is particularly threatened by this increase in food insecurity as are other vulnerable nations worldwide who depend on Ukrainian wheat/food supplies). The rhetoric has deteriorated further with the Russian regime alleging that the Ukrainians are planning to use a 'dirty bomb', which many indicate may be their 'cover' for planning to do so themselves (see BBC: <https://www.bbc.com/news/world-63373637> ). With winter approaching fast and the increasing vulnerability of power supplies, despite a heroic defence response and attempted prevention of these attacks, the Ukrainian people are severely at risk from cold – amongst many other things.

See: <https://www.bbc.com/news/world-europe-63463697> and <https://www.bbc.com/news/world-europe-63458641>

**We continue to endorse our IAAP statement on Ukraine** indicating our: *“deep concern about the military and humanitarian offenses the Russian Federation is carrying out in Ukraine, resulting in ongoing devastating loss of life and attack on innocent civilians. We strongly condemn this unjustified aggression and stand in solidarity with the people of Ukraine”.* (see: <https://iaapsy.org/about/human-rights-statement/ukraine/> )

- **The UK:** Britain has had three Prime Ministers in a period of seven weeks! – concluding (for the time being) with the appointment of Rishi Sunak and his new cabinet – see: <https://www.bbc.com/news/uk-politics-63376560>
- **Brazil (31.10.22):** Brazil's electoral chief has declared Luíz Inácio Lula da Silva the winner of the presidential election; however (as we write - more than 17 hours after), defeated incumbent Jair Bolsonaro has yet to concede. His silence is raising concern that he may not accept the result.  
See: <https://www.bbc.com/news/world-latin-america-63451859>
- **USA: threat to democracy:** A man has been charged with attempting to kidnap senior US politician Nancy Pelosi and assaulting her husband. The 42-year-old is accused of breaking into the couple's San Francisco home early on Friday and assaulting Paul Pelosi, 82, with a hammer. He had been searching for the top Democrat and reportedly shouted "where is Nancy?" while inside the property. Mrs Pelosi, second in line to the presidency, was on the other side of the country at the time. See:

- **World economic outlook - Inflation and uncertainty(Oct. 2022):** - see: <https://www.imf.org/en/Publications/WEO/Issues/2022/10/11/world-economic-outlook-october-2022>  
Global economic activity is experiencing a broad-based and sharper-than-expected slowdown, with inflation higher than seen in several decades. The cost-of-living crisis, tightening financial conditions in most regions, Russia’s invasion of Ukraine, and the lingering COVID-19 pandemic all weigh heavily on the outlook. Global growth is forecast to slow from 6.0 percent in 2021 to 3.2 percent in 2022 and 2.7 percent in 2023. This is the weakest growth profile since 2001 except for the global financial crisis and the acute phase of the COVID-19 pandemic.

- **Environmental Crises:** Key UN reports warn urgent and collective action needed – as oil firms report astronomical profits. The climate crisis has reached a “really bleak moment”, one of the world’s leading climate scientists has said, after a slew of major reports laid bare how close the planet is to catastrophe. Collective action is needed by the world’s nations more now than at any point since the second world war to avoid climate tipping points, Prof Johan Rockström said, but geopolitical tensions are at a high. See: <https://www.theguardian.com/environment/2022/oct/27/world-close-to-irreversible-climate-breakdown-warn-major-studies>
- **Ongoing presence of COVID-19 pandemic:** see below

All of these events continue to affect our patients and ourselves. Our role as psychologists/health practitioners is to attempt to instil hope, empowerment and some sense/semblance of control and efficacy in those we aim to help. It continues to be a difficult time for us all during this time of ongoing global turbulence.

### **The World in the Time of COVID-19:**

(see: <https://covid19.who.int/>)

**The WHO Coronavirus Disease ‘dashboard’** indicates that there are now (31.10.22) **627,104,342 confirmed cases of COVID-19, an increase of more than ~14.87 million registered cases world-wide** in the past month alone - with **6,567,552 deaths** from COVID-19 world-wide ... (compared to previous months’ figures: 27.9.22: **612,236,677 confirmed cases and 6,514,397 deaths**; 19.8.22: 591,683,619 confirmed cases and 6,443,306 deaths; 22.7.22: 565,207,160 confirmed cases and 6,373,739 deaths; 23.6.22: 539,893,858 cases and 6,324,112 deaths; 23.5.22: 521,920,560 cases and 6,274,323 deaths; 25.4.22: 505,817,953 cases and 6,213,876 deaths; 28.3.22: 476,374,234 confirmed cases and 6,108,976 deaths; 22.2.22: 422,188,754 cases, 5,876,766 deaths; 21.1.22: 340,543,962 cases, 5,570,163 deaths; 27.12.21: 279,114,972 confirmed cases, 5,397,580 deaths; 23.11.21: 256,966,237 cases, 5,151,643 deaths; 25.10.21: 243,260,214 cases, 4,941,039 deaths; 21.9.21: 228,394,572 cases, 4,690,186 deaths; 23.8.21: 211,373,303 cases, including 4,424,341 deaths; 26.7.21: 192,284,207 cases; 4,136,518 deaths; 22.6.21: 178,202,610 confirmed cases; 3,865,738 deaths; 23.5.21: 166,346,635 confirmed cases, including 3,449,117 deaths; 5.21: 152,535,452 cases, 3,198,528 deaths; 22.3.21: 22,524,424 cases, 2,703,620 deaths; 22.2.21: 111,102,016 cases, 2,462,911 deaths; 25.1.21: 99,363,697 cases, 2,135,959 deaths; 28.12.20: 79,673,994 cases, 1,761,381 deaths; 23.11.20: 57,882,183 cases, 1,377,395 deaths; 29.10.20: 43,766,712 cases, 1,163,459 deaths; 26.7.20: 15,581,009 cases, 635,173 deaths; 20.6.20: 8,385,440 cases, 450,686 deaths; 26.4.20: 2.8million cases, 200,000 deaths). It is estimated that the true prevalence is likely to be at least double this, with these figures representing a gross underestimate due to being based on ‘formal testing and reporting’ which continues to diminish.

**Vaccinations:** As of 25.10.22: **12,830,378,906 vaccine doses** have been administered world-wide (compared to: 19.9.22: 12,640,866,343 vaccine doses 16.8.22: 12,409,086,286 doses; 22.7.22: 12,219,375,500 doses; 20.6.22: 11,912,594,538 doses; 22.5.22: 12,186,798,032 doses; 17.4.22: 11,324,805,837 doses ; 26.3.22: 11,054,362,790 vaccine doses ; 20.2.22: 10,407,359,583; 18.1.22: 9,571, 633; 27.12.21: 8,649,057,088; 21.11.21: 7,408,870,760 vaccine doses; 20.10.21: 6,655,399,359; 17.9.21: 5,776,127,976; 19.8.21: 4,562,256,778; 24.7.21: 3,646,968,156; 16.6.21: 2,413,847,050 vaccine doses). Sadly, the majority of these have been given in the developed world with less-well-off continents/countries still lagging.

See: WHO Coronavirus Dashboard: <https://covid19.who.int/>

### **APPENDIX: PREVIOUS ITEMS/RESOURCES of interest:**

**(from former editions of Division 17 E-News: December, 2021 - July, 2022 newsletters)**

***September-October, (2022) (with thanks to the APA, APS, PBS, ABC – and other sources)***

**Suicides from firearms prompt movement to address mental health stigmas**

**(PBS Newshour: Aug 23, 2022)**

See: <https://www.pbs.org/newshour/show/high-rate-of-suicides-prompt-movement-to-address-mental-health-and-firearms>

When it comes to gun deaths in America, suicide is still the leading cause. A new poll finds that most Americans, 71 percent, believe gun laws should be stricter, one in five now say that they, a family

member or a close friend has experienced gun violence or been threatened by it in the past five years. Among Black Americans, that number jumps to more than 50 percent. At the same time, 60 percent say it's still important that people can own guns for personal protection. When it comes to gun deaths in America, suicide is still the leading cause.... **William Brangham** recently went to Wyoming, the state with the highest suicide rate, to look at a movement trying to change the conversation around mental health and firearms.

### **August-September, 2022:**

**For items/resources of interest from previous Division 17 E-News, see Appendix below)**

- **How Psychology Can Help Fight Climate Change—And Climate Anxiety**  
Speakers at APA 2022 made it very clear (as reported by 'TIME'): Psychology is crucial to addressing the climate crisis, both in identifying ways to change human behavior and helping people with mental health challenges brought on by extreme weather. The speakers offered tips such as harnessing anger for action and connecting with meaningful dialogue about climate change denial.  
See: <https://time.com/6204083/climate-change-mental-health-psychology/>
- **Why Tween Girls Especially Are Struggling So Much**  
Children's mental health is not a new issue (although it is worsening), and many psychologists are concerned for tween girls in particular, as highlighted by the *Washington Post*. The middle school years can be especially rough for girls, as puberty often sets in just as increases in pressures in appearance, friendship, academics, and sports are occurring. Young girls are more likely to use social media than boys and more likely to be negatively affected by it. **See:**  
<https://www.washingtonpost.com/health/2022/08/08/tween-girls-mental-health/>
- **For Psychologists of Color, Self-Care is Much More Than That**  
Living in a world that is not just, equitable, or safe has reinforced why many psychologists of color choose to think deeply and be more intentional about how they practice self-care. Among their new ideas: Self-care should incorporate one's community, values, and culture; it involves setting boundaries; and it's about claiming joy, pleasure, and rest despite a legacy of oppression.  
**See:** <https://www.apa.org/> (Reference: [For psychologists of color, self-care is much more than that](#))
- **Alzheimer's Researchers Are Looking Beyond Plaques and Tangles for New Treatments**  
Past research on Alzheimer's disease has looked at plaques and tangles in the brain, which are a "hallmark" of the disease, said **Maria Carrillo, PhD**, chief science officer of the Alzheimer's Association, but that research hasn't pinpointed how the plaques and tangles kill brain cells. Carrillo and other neuroscientists are rethinking the approach to study the changes in the brain and develop new treatments, as highlighted by *NPR*.  
**See:** <https://www.npr.org/sections/health-shots/2022/08/01/1113825311/alzheimers-researchers-are-looking-beyond-plaques-and-tangles-for-new-treatments>
- **APA Adopts Racial Equity Action Plan**  
At APA 2022, APA outlined next steps the association and psychology should take to prioritize and operationalize the commitments made in the association's 2021 apology for its role in contributing to racism. Among the steps recommended: Ensure equitable representation of scholars of color in leadership positions; redesign traditional research methodologies to improve equity, diversity, and inclusion; implement efforts that mitigate barriers to graduate training completion; and more. The newly created Racial Equity Fund, developed to move this work forward, will be seeded by a \$1.1 million grant from APA.  
**See:** <https://www.apa.org/> (Reference: [APA adopts racial equity action plan](#) )

- **Workplace Well-Being Survey:** A new survey reveals 71% of workers believe their employer is more concerned about mental health now than in the past. See: <https://www.apa.org/> (Reference: **“Workers appreciate and seek mental health support in the workplace”** )

- **APA resources for coping with mass shootings, understanding gun violence: A Cascade of Collective Traumas:**  
 The regularity of mass shootings is razing Americans’ mental health—heightening stress and dulling compassion in ways that demand broader concern, engagement, and change. “Just because we can’t fix a problem in its entirety doesn’t mean that we shouldn’t do what we can do to make a difference,” said Paul Slovic, PhD, a professor of psychology at the University of Oregon. “We cannot afford to let our minds deceive us into underreacting.” See APA resources for coping with mass shootings and understanding gun violence.

### July-August, 2022

- **WHO's MENTAL HEALTH REPORT: released 1<sup>st</sup> July, 2022**  
**Press Release and REPORT (LINKS)**

**MEDIA ADVISORY**  
Science in 5: Mental Health  
Friday, 1 July, 2022

WHO's World Mental Health Report says that Mental Health is the leading cause of disability. How did the pandemic impact our mental health? What are the signs and how can we keep ourselves mentally healthy? Dr Mark Van Ommeren explains in Science in 5. Refer to the full [Report](#) .

- **Ken Burns Film Explores Youth Mental Health: "Hiding in Plain Sight: Youth Mental Illness:**

See PBS Newshour: <https://www.pbs.org/newshour/show/ken-burns-film-explores-youth-mental-health>

Awareness of mental health across all spectrums of the population has been growing after years living in the COVID pandemic. But there are particular concerns about the youngest generations. Those topics are explored in *Ken Burns' film, "Hiding in Plain Sight: Youth Mental Illness,"* which airs Monday night on PBS. Student Reporting Labs' Matt Suescun and Faiza Ashar spoke to Burns to learn more.

(PBS NEWSHOUR: June 27<sup>th</sup>, 2022)

- **Psyched Up: The race to make psychedelic drugs part of mainstream medicine**

In Australia and overseas there's a push to make psychedelic drugs part of mainstream medicine for the treatment of trauma and other mental health conditions.

Results from clinical trials are promising for PTSD sufferers where conventional treatments have failed.

Four Corners investigates the world of psychedelic drugs, including the underground supply which is being sourced by increasing numbers of people who don't want to wait for the clinical trials to be concluded.

#### COPING WITH TRAUMA:

- **As a Crisis Hotline Grows, So Do Fears It Won't Be Ready:** The National Suicide Prevention Lifeline (USA) will have its own three-digit number, 988, starting in July—a shift that is expected to grow exponentially the number of callers over the next few years. The increased access is important, but experts say that more funding is needed to effectively staff the line. Roughly 17% of the lifeline's two million calls last year were abandoned before a caller could get help, as reported by *The New York Times*. Read more from APA about crisis lines during the pandemic.  
<https://www.nytimes.com/2022/03/13/us/suicide-hotline-mental-health-988.html>
- **Addressing the Pandemic's Mental Health Fallout:** <https://www.cbsnews.com/news/addressing-the-pandemics-mental-health-fallout/#>  
Even when COVID-19 recedes, Americans will still be left with the trauma the virus has left in its wake, including more than 140,000 children who have lost a parent or caregiver. APA CEO **Arthur C. Evans Jr., PhD**, spoke with *CBS News* about the need to address the ongoing mental health crisis. "Because what we know from research is that when people experience these kinds of traumas—after 9/11, or Hurricane Katrina—we expect to see people experiencing problems for at least another seven to ten years out," Evans said.
- **American's Stress is Spiking Over Inflation and War in Ukraine:**  
The APA's newest '**Stress in America**' survey found that over 80% of Americans said inflation, global uncertainty, and issues related to invasion of Ukraine are significant sources of stress. This is the highest number of people who have said they're significantly stressed about any issue in the 15 years APA has conducted this survey. "Typically, our highest levels of stress have been in the mid-60%, so hitting, for example, 87% for inflation as a source of stress is truly astounding," said psychologist **Vaile Wright, PhD**, APA's senior director of health care innovation in an NPR article:  
<https://www.apa.org/news/press/releases/stress/2022/march-2022-survival-mode>
